Red Sprites - (4K UHD)

May 2016 Near Plainview, TX

Wikipedia Definition: **Sprites** are large-scale [electrical discharges](#) which occur high above a [thunderstorm](#) cloud, or [cumulonimbus](#), giving rise to a quite varied range of visual shapes. They are triggered by the discharges of [positive lightning](#) between the thundercloud and the ground.^[7] The phenomena were named after the mischievous [sprite](#), e.g., Shakespeare's [Ariel](#) or [Puck](#),^[8] and is also an acronym for **S**tratospheric/**m**esospheric **P**erturbations **R**esulting from **I**ntense **T**hunderstorm **E**lectrification.^[9] They normally are colored reddish-orange or greenish-blue, with hanging tendrils below and arcing branches above. They can also be preceded by a reddish halo, known as a sprite halo. They often occur in clusters, lying 50 kilometres (31 mi) to 90 kilometres (56 mi) above the [Earth's](#) surface. Sprites have been witnessed thousands of times.^[10] Sprites have been held responsible for otherwise unexplained accidents involving high altitude vehicular operations above thunderstorm

Winter Storm & Blizzard Highlights (SD/HD/UHD/DCI 4K)

A collection of my absolute best winter storm and blizzard footage, from New Jersey to New England, covering the last 20 years. Includes footage of the record breaking blizzard of January 2016, where over 30 inches of snow fell in New York City. Footage of complete whiteout conditions, people out and about in blizzard conditions, vehicles negotiating whiteout conditions and snow covered roads, POV shots, cars & vehicles stuck in the snow, and people digging out. **30min of footage in total.**

Lake Effect Snow Highlights (HD/UHD)

Lake effect snow storms are responsible for some of the most dramatic snow accumulations here in the United States. Usually measured in **FEET**, not inches. Footage of complete whiteout conditions, people out and about in blizzard conditions, vehicles negotiating whiteout conditions and snow covered roads, cars & vehicles stuck in the snow, and the aftermath the following day showing people digging out from under 5 feet of snow in some cases! **22min of footage in total.**

Ice Flows-Ice Jams: East River/Hudson River/NY Harbor 2015

Major Ice Flows & Ice Jams- East River, Hudson River & NY Harbor NYC February 2015 (HD)

Record cold temperatures during the middle and latter part of winter 2014-2015 directly contributed to incredible ice formation along the East River and Hudson River. This screener features these amazing ice flows as they move past the Brooklyn Bridge, Manhattan Bridge, and Williamsburg Bridge. Screener also includes footage shot from a boat sailing through an ice filled Hudson River, East River, and NY Harbor.
